

THE AI COMMUNITY FOR HUMAN FLOURISHING — SINCE 2024

What is AI Socratic?

AI Socratic is a decentralized, curated community of top-tier AI engineers, researchers, and founders working on frontier AI. Born in 2024 from a seven-person dinner in Brooklyn, it has grown into a global network of chapters across major AI hubs including New York, San Francisco, Milan, Madrid, London, and Berlin. Every gathering is guided by the Socratic method — dialogues over debates, collaboration over competition — spanning monthly symposium dinners, hands-on technical workshops, and casual AI cafes. The community also offers AI consulting and team training through its network of senior practitioners. Its mission: ensure everyone can own and benefit from AI.

What we do

Socratic Dinners

Monthly moderated symposiums on frontier models, papers, and AI philosophy — 40–80 senior attendees per chapter.

Workshops & Cafes

Hands-on technical sessions with senior practitioners, plus casual small-group AI cafes between events.

Consulting

AI strategy, implementation, and team training from the network — an Anthropic Certified Consulting Partner.

Our mission is to ensure everyone can own and benefit from AI. We believe AI's future must emerge from a diverse, global community of thinkers, builders, and practitioners.
